INTRODUCTION

Sound can reverberate at levels that don't create the best environment for work or relaxation. Having proper acoustics in the office or a hotel loft is an important issue that can easily be overlooked. Implementing sound-absorbing materials can significantly reduce noise disturbances in these spaces. Ultimately, fostering an environment that is favorable to increased privacy, concentration, and relaxation enhances overall productivity and guest satisfaction.

Our company's aim is to bring innovations into modern interiors. With our acoustic product line, luminaires bring you not just light but noise filtering. Whether you install our acoustic luminaires on walls or ceiling, they will improve the sound quality of the room.

Pont Light provides a wide range of possibilities through various design solutions. Our company accepts custom requests, so we are ready to bring to life our clients' imagination. Please feel free to use this catalogue to find inspiration that suit your project. Discover our collection of luminaires, color selections, and pre-designed solutions featuring V-Cut technology.

ACOUSTIC PANEL INFORMATIONS

Explore the technical information available on this page to discover all possibilities.

These luminaires are also available with multiple mounting options: multi-point, single-point, rod pendant construction or surface mounted mode with spacers.

THICKNESS OPTIONS

Acoustic sheets are available with two panel thicknesses.

PARASOL

acoustic

We are proud that our acoustic luminaire PARASOL won a Red Dot Design award in lighting design category!

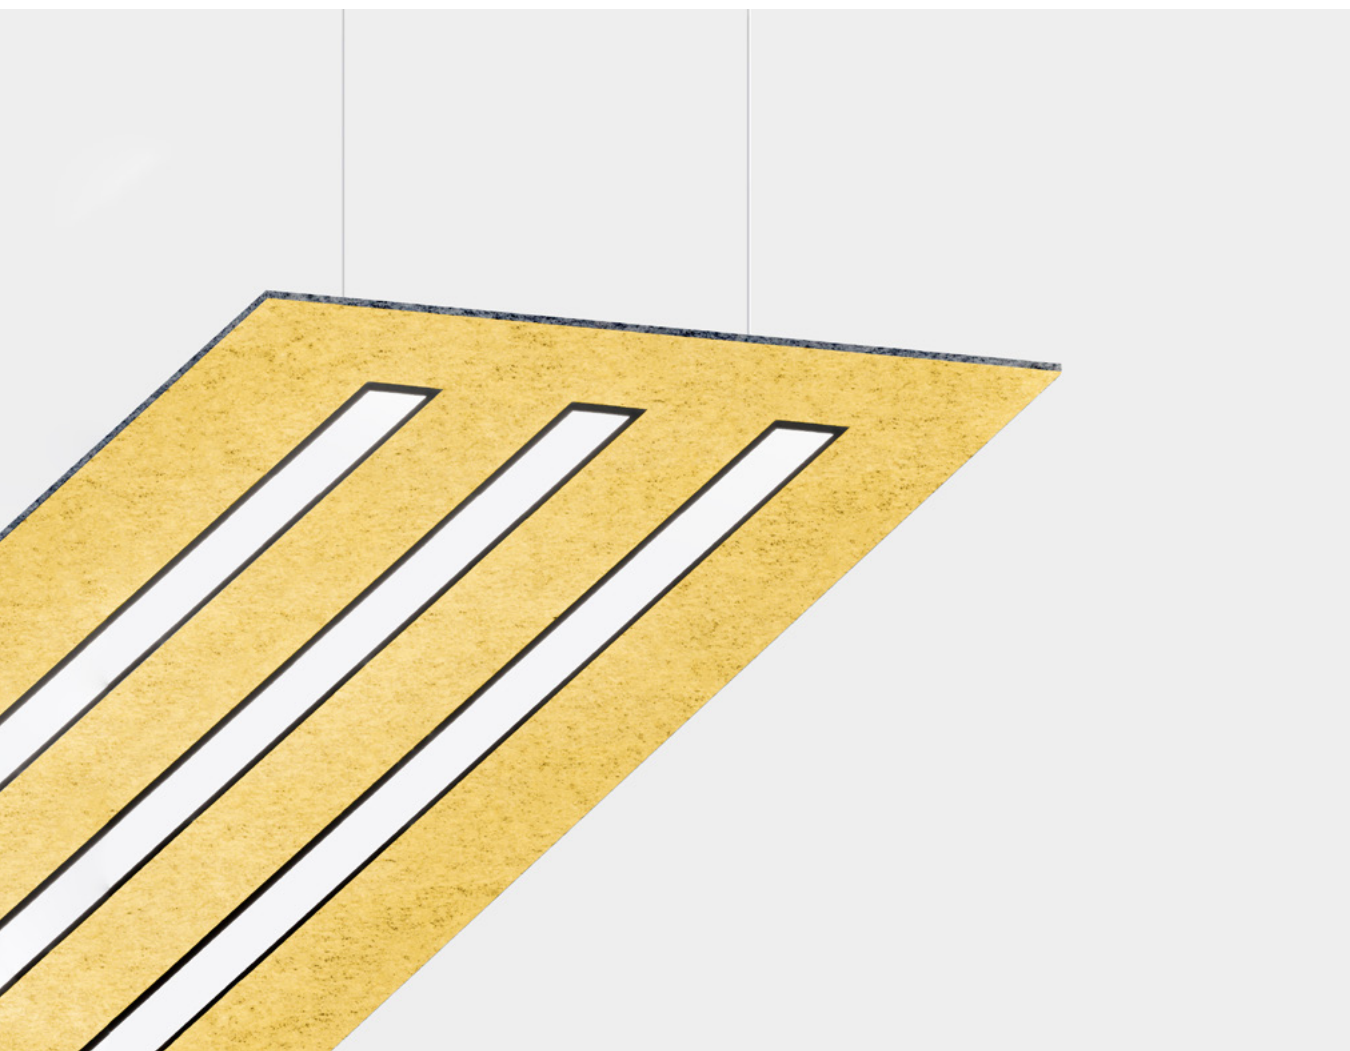

PARASOL has two options to choose from. Parasol Task has a traditional direct only light distribution. The other member of the luminaire family comes with a covering panel so it becomes an indirect only luminaire, it's called Parasol Ambience.

CATEGORY

Standard

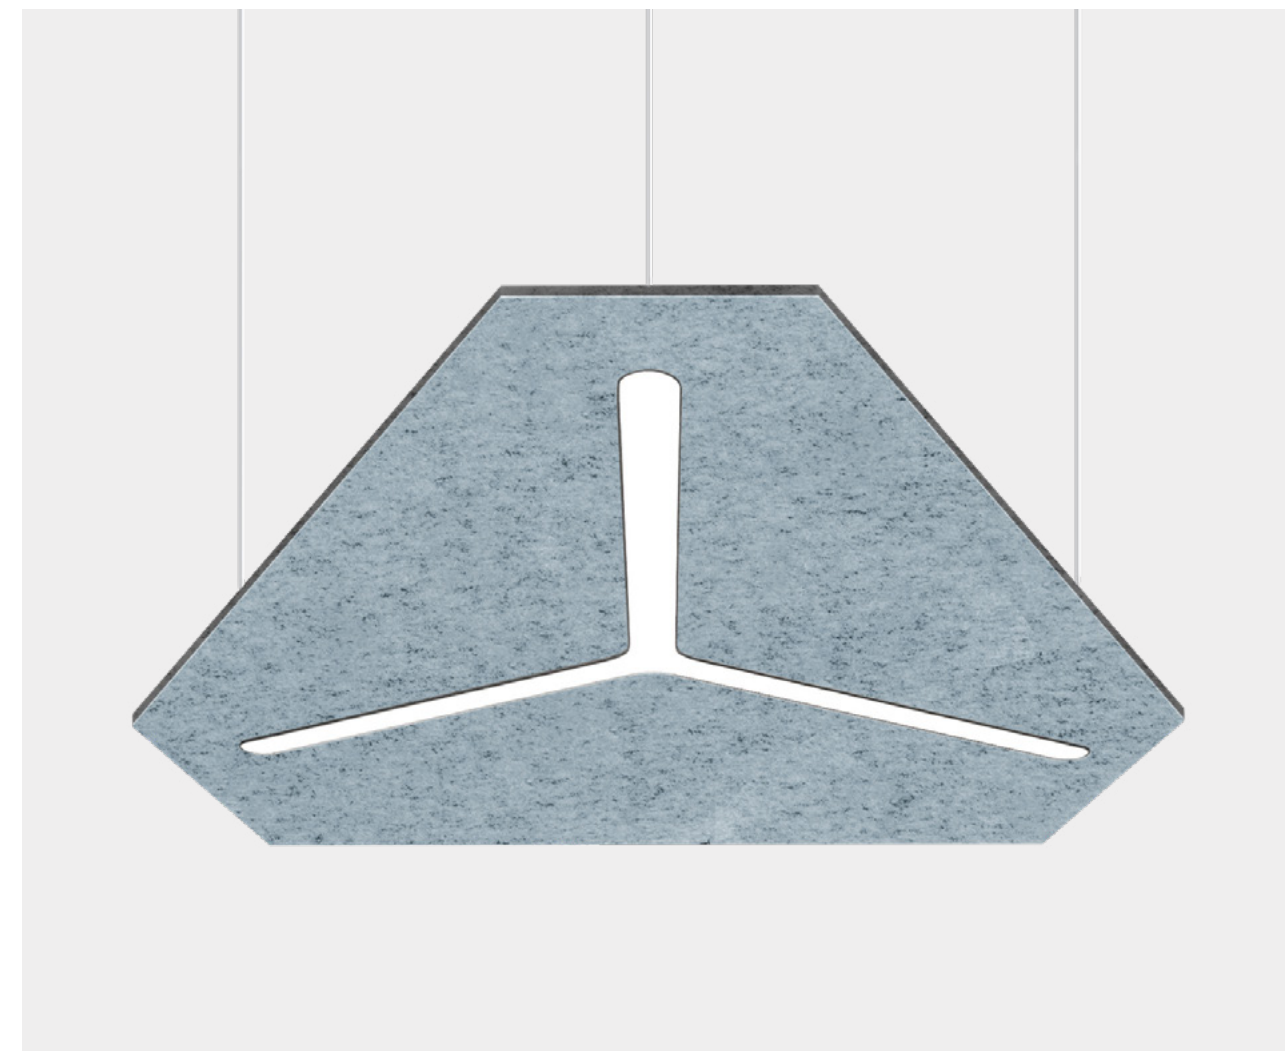

This category showcases luminaires from our Architectural series, highlighting their compatibility with various acoustic panels to spark ideas for your projects.

Linear.

LINA
acoustic

The linear design and compact size make it perfect for seamless integration into modern and contemporary spaces, especially when complemented by colored acoustic panels.

YUMI

CATEGORY

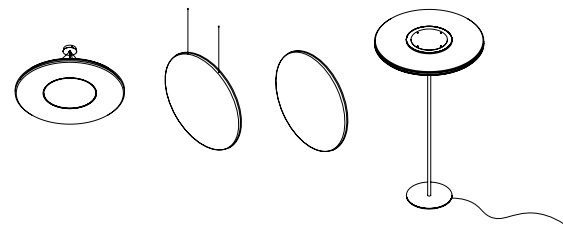

TONDO family

This product family serves as a versatile product line that connects multiple spaces within larger facilities through its thoughtful design.

TONDO family

acoustic

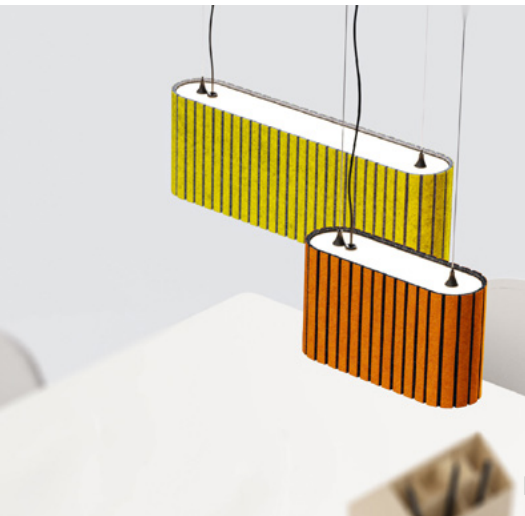

TONDO family is designed to be installed wherever needed, offering multiple mounting options such as pendant, vertical pendant, wall, or even a freestanding version.

CATEGORY

V-CUT Solutions

This category features a newly developed design that defines the product family. The V-Cut solution enhances the structure of acoustic panels and provides greater flexibility in design. Feel free to draw inspiration for your projects.

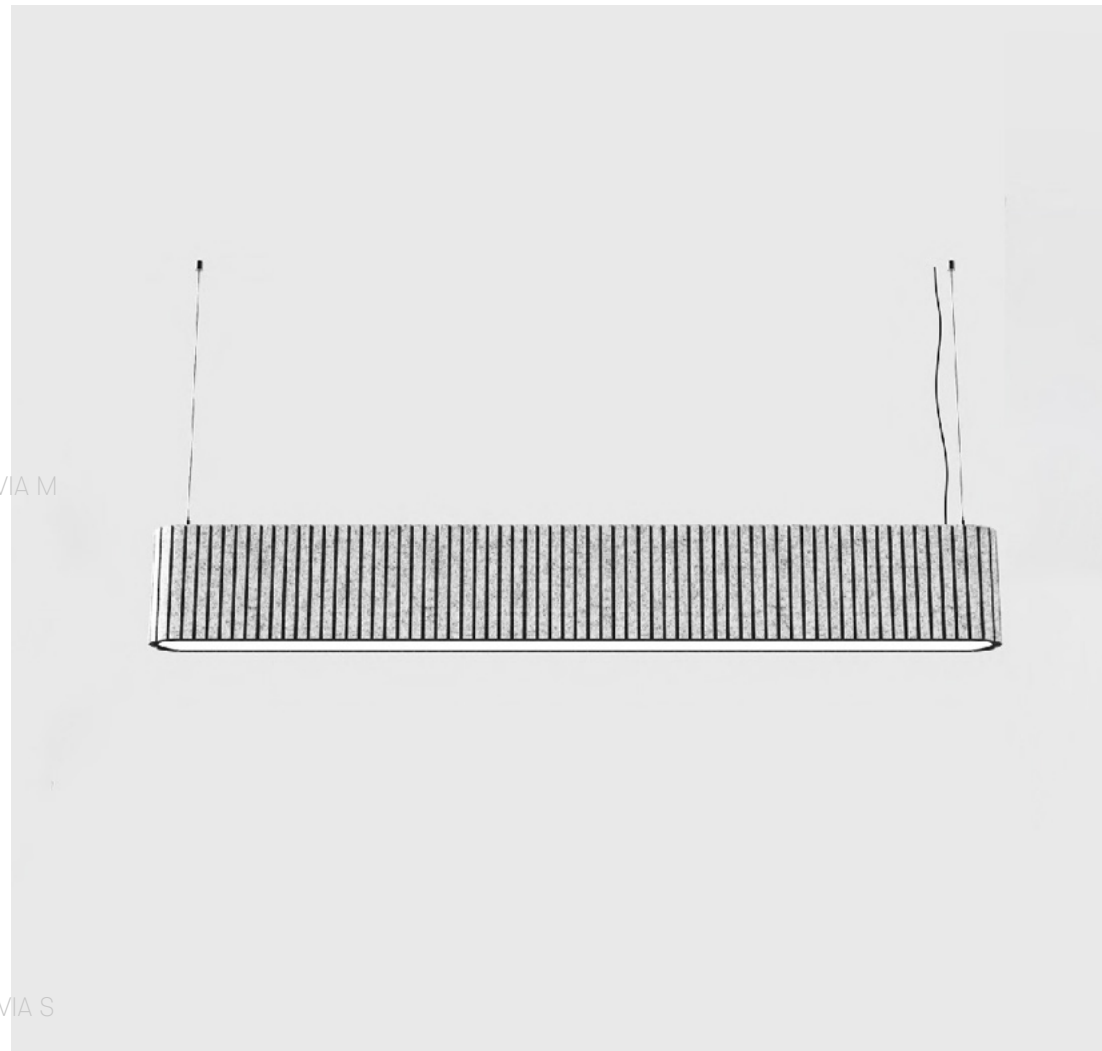

LIVIA M

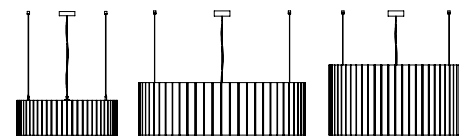

LIVIA L

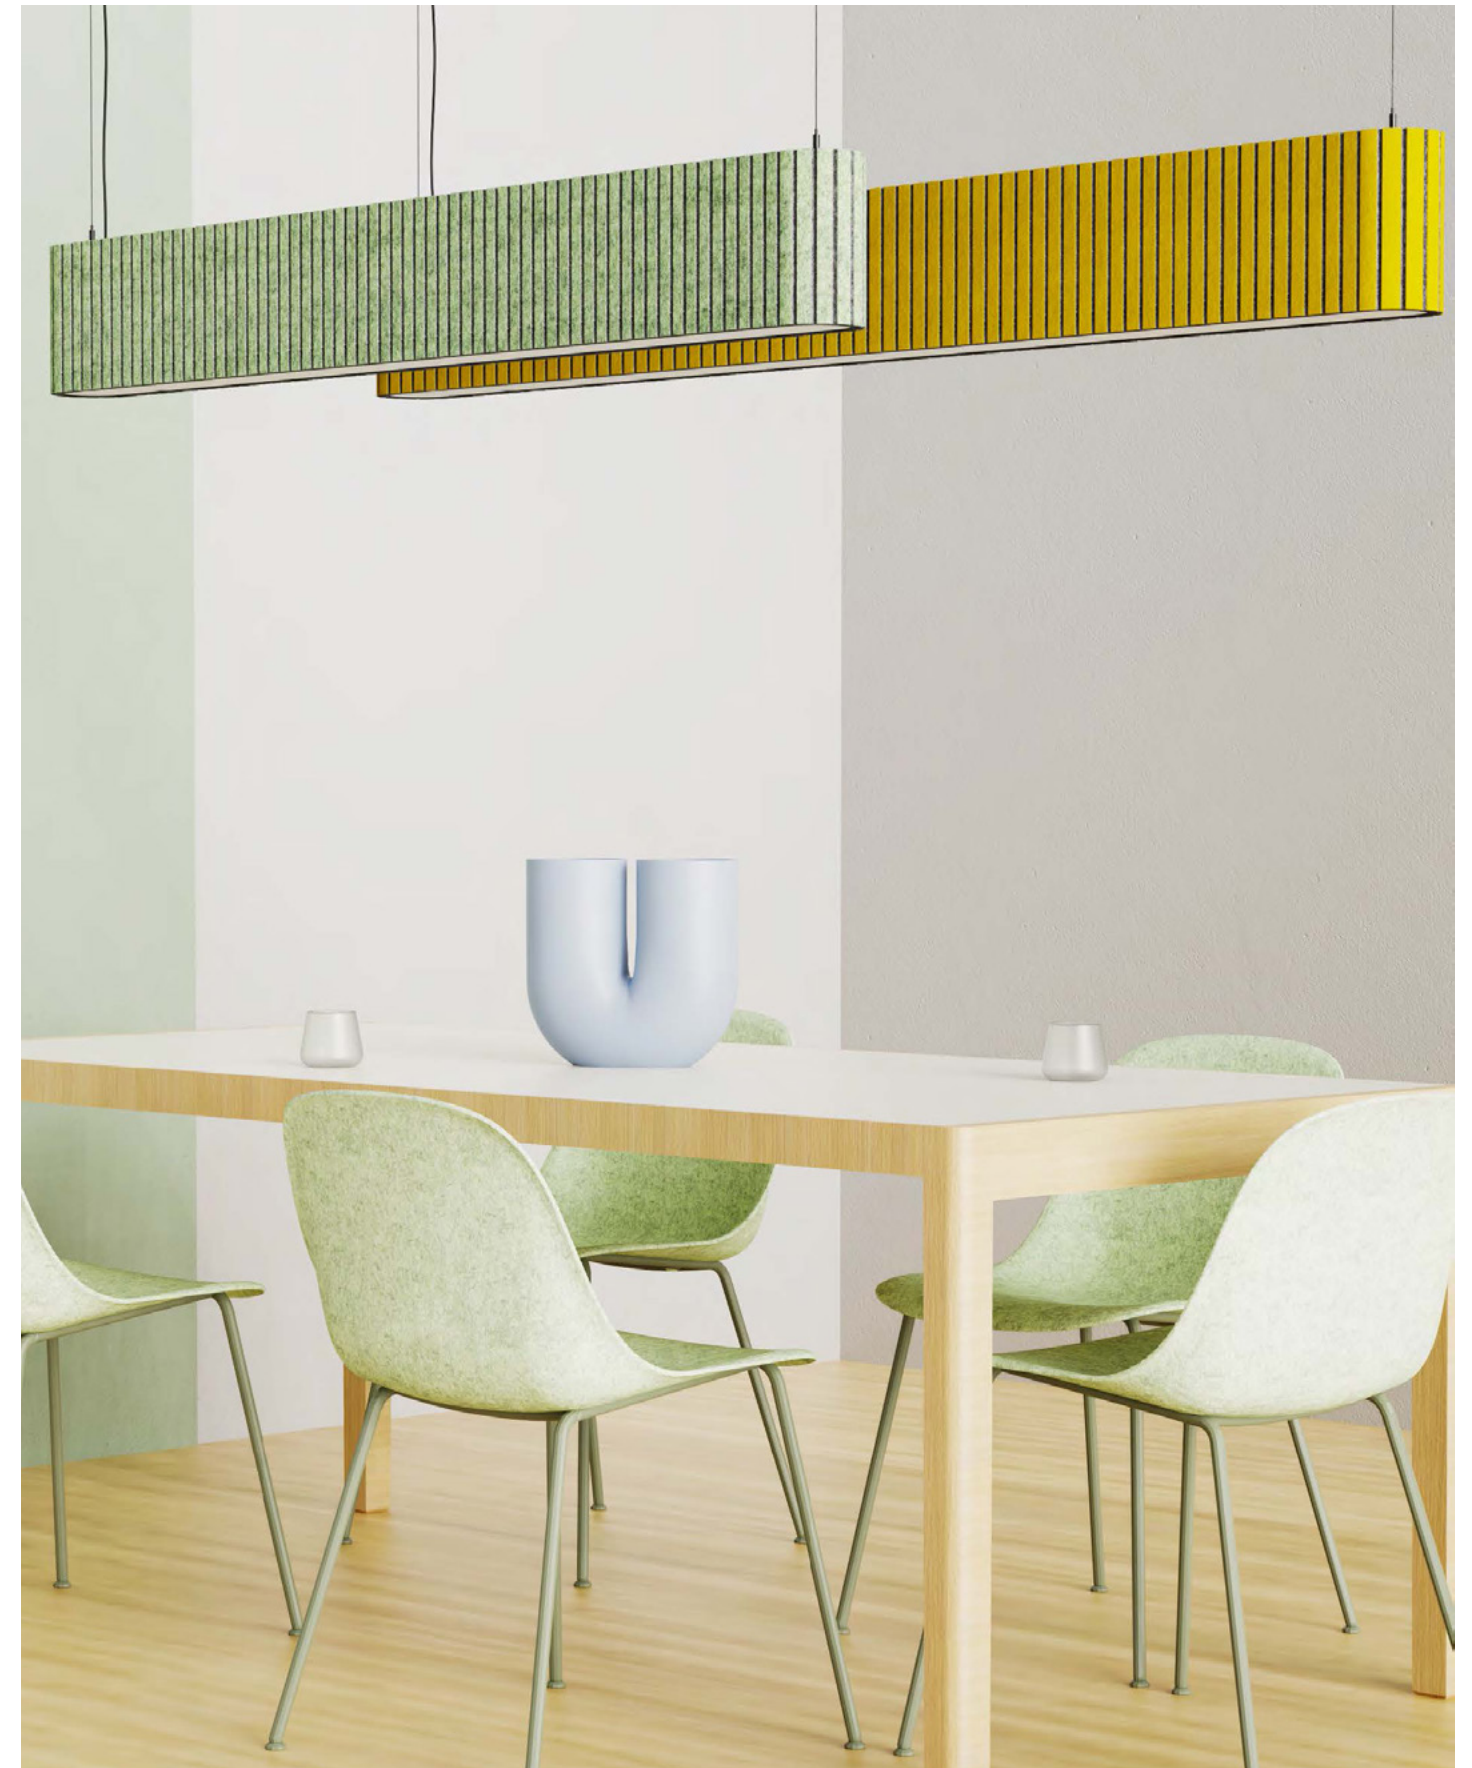

LIVIA S

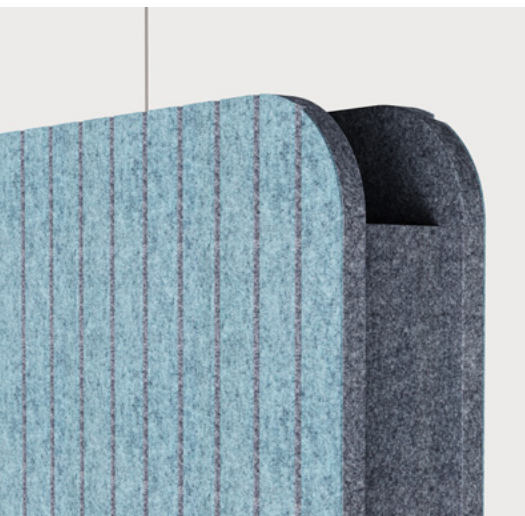

LIVIA acoustic

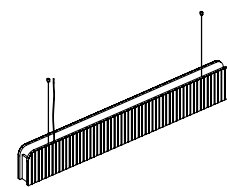

Available with three option:
Livia S, Livia M & Livia L.
The luminaires have different
profile heights as acoustic
panel becomes bigger. Livia M
has a wider lighting surface.

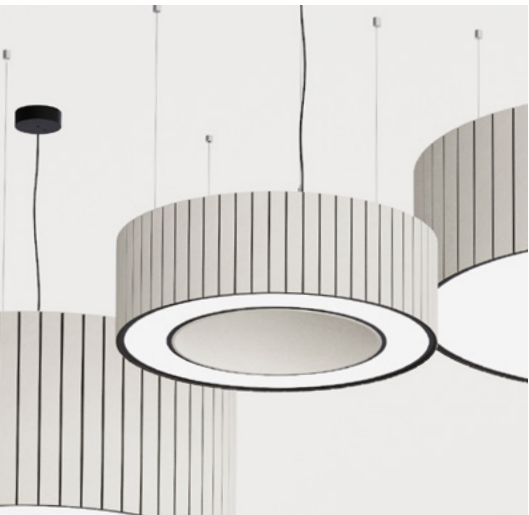

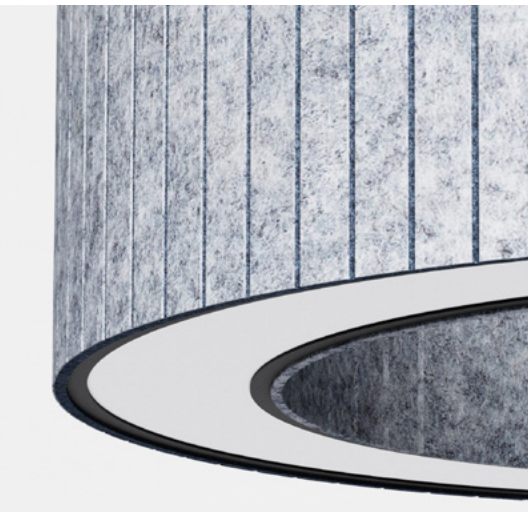

LINA

acoustic

Special forms with V-CUT acoustic panel. Designed for office or retail, as well as conference spaces.

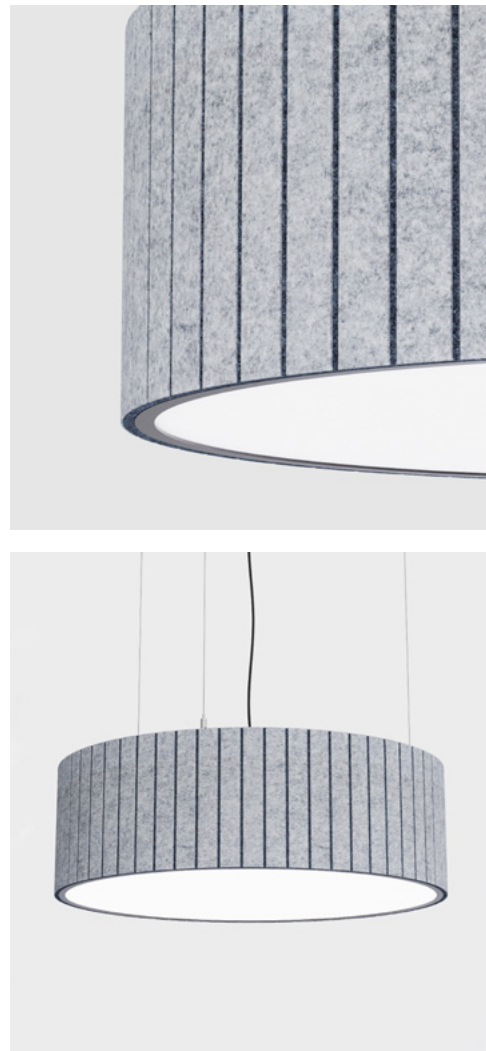

OLIVE
acoustic

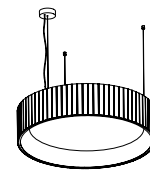

Available with two option: Olive 20 & Olive 30. The luminaires have 200 mm or 300 mm profile heights as acoustic panel becomes bigger.

RIVA SLIM

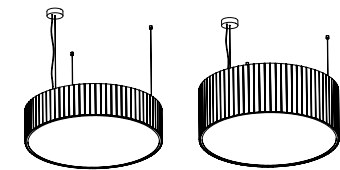

acoustic

This luminaire stands out within the product family due to its recessed lighting surface, achieved by placing the diffuser higher in the profile.

RIVA

acoustic

Available with two options: Riva 20 & Riva 30. The luminaires have 200 mm or 300 mm profile heights as acoustic panel becomes bigger.
